COMMENTS	My research: <input type="checkbox"/> did <input checked="" type="checkbox"/> did not reveal any prior sales or transfers of the subject property for the three years prior to the effective date of this appraisal.																																																																																																																																																																		
	Prior Sale/Transfer: Date: NA Price: NA Source(s): Preble County Records																																																																																																																																																																		
	Analysis of prior sale transfer history of the subject property (and comparable sales, if applicable): The subject property has not sold or transferred during the previous three year period from the date of this appraisal assignment. Comparable #1 transferred to the lender March 1, 2013 for \$46,667. Comparable #2 recorded a cashless transfer of ownership on July 8, 2013.																																																																																																																																																																		
SALES COMPARISON APPROACH	Offerings, options and contracts as of the effective date of the appraisal: The subject property is not currently under contract and is not currently listed on the open market.																																																																																																																																																																		
	Marketability Comments: Mortgage rates are currently at historic lows, making home ownership an attractive option. Credit markets, however, have tightened thereby limiting access to some mortgage products. Median sales prices have generally declined throughout the southwest Ohio region during the previous five year period. In the subject property's market area, however, median sales prices have remained stable during the previous two year period ending January 1, 2014, with a median sales price of \$102,000 during the previous twelve month period. Sales of lender-owned dwellings represent approximately 15% of market activity during the previous twelve month period, negatively affecting both average and median sales prices in the market area.																																																																																																																																																																		
	Site Comments: See Attached Addendum																																																																																																																																																																		
SALES COMPARISON APPROACH	Improvement Comments: An exterior-only appraisal of the subject property was performed. The subject is a one-story dwelling, and according to Preble County records was built in 1994 with 1296 square feet of gross living area, and includes 3 bedrooms and 2 baths, and is located on an approximate 1.55 acre lot. The exterior of the subject appears adequately maintained, with no significant deferred maintenance evident. The overall condition of the subject property is considered average for the market area.

	Discussion of methods and techniques employed, including reason for excluding an approach to value: The Cost Approach was not considered applicable due to the difficulty in estimating depreciation of a 20 year old dwelling. Scope of Work, Assumptions and Limiting Conditions

Scope of work is defined in the Uniform Standards of Professional Appraisal Practice as "the type and extent of research and analyses in an assignment." In short, scope of work is what the appraiser did and did not do during the course of the assignment. It includes, but is not limited to: the extent to which the property is identified and inspected, the type and extent of data researched, the type and extent of analyses applied to arrive at opinions or conclusions.

The scope of this appraisal and ensuing discussion in this report are specific to the needs of the client and to the intended use of the report. This report was prepared for the sole and exclusive use of the client for the identified intended use and no use by any other parties is prohibited. The appraiser is not responsible for unauthorized use of the report.

The appraiser's certification appearing in this appraisal report is subject to the following conditions and to such other specific conditions as are set forth by the appraiser in the report. All extraordinary assumptions and hypothetical conditions are stated in the report and might have affected the assignment results.

1. The appraiser assumes no responsibility for matters of a legal nature assumed to be good and marketable. The property is appraised as though under responsible ownership.

2. Any sketch in this report may show approximate dimensions and is included only to assist the reader in visualizing the property. The appraiser has made no survey of the property.

3. The appraiser is not required to give testimony or appear in court because of having made the appraisal with reference to the property in question, unless arrangements have been previously made thereto.

4. Neither all, nor any part of the content of this report, copy or other media thereof (including conclusions as to the property value, the identity of the appraiser, professional designations, or the firm with which the appraiser is connected), shall be used for any purposes by anyone but the client and other intended users as identified in this report, nor shall it be conveyed by anyone to the public through advertising, public relations, news, sales or other media, without the written consent of the appraiser.

5. The appraiser will not disclose the contents of this appraisal report unless required by applicable law or as specified in the Uniform Standards of Professional Appraisal Practice.

6. Information, estimates, and opinions furnished to the appraiser, and contained in the report, were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy of such items furnished to the appraiser is assumed by the appraiser.

7. The appraiser assumes that there are no hidden or unapparent conditions of the property, subsoil, or structures, which would render it more or less valuable. The appraiser assumes no responsibility for such conditions, or for engineering or testing, which might be required to discover such factors. This appraisal is not a home inspection or environmental assessment of the property and should not be considered as such.

8. The appraiser specializes in the valuation of real property and is not a home inspector, building contractor, structural engineer, or similar expert, unless otherwise noted. The appraiser did not conduct the intensive type of field observations of the kind intended to seek and discover property defects. The viewing of the property and any improvements is for purposes of developing an opinion of the defined value of the property, given the intended use of this assignment. Statements regarding condition are based on surface observations only. The appraiser claims no special expertise regarding issues including, but not limited to: foundation settlement, basement moisture problems, wood destroying (or other) insects, pest infestation, radon gas, lead based paint, mold or environmental issues. Unless otherwise indicated, mechanical systems were not activated or tested.

This appraisal report should not be used to disclose the condition of the property as it relates to the presence/absence of defects. The client is invited and encouraged to employ qualified experts to inspect and address areas of concern. If negative conditions are discovered, the opinion of value may be affected.

Unless otherwise noted, the appraiser assumes the components that constitute the subject property improvement(s) are fundamentally sound and in working order.

Any viewing of the property by the appraiser was limited to readily observable areas. Unless otherwise noted, attics and crawl space areas were not accessed. The appraiser did not move furniture, floor coverings or other items that may restrict the viewing of the property.

9. Appraisals involving hypothetical conditions related to completion of new construction, repairs or alteration are based on the assumption that such completion, alteration or repairs will be competently performed.

10. Unless the intended use of this appraisal specifically includes issues of property insurance coverage, this appraisal should not be used for such purposes. Reproduction or replacement cost figures used in the cost approach are for valuation purposes only, given the intended use of the assignment. The Definition of Value used in this assignment is not coverage unless otherwise stated by the appraiser.
